

ISSUES/DESCRIPTIONS REPORT

2nd Quarter 2010

WBZ-TV Boston

WBZ-TV Boston, MA
Quarterly Issues/Program List
CBS Corporation

April 1 through June 30, 2010

Attached are listings of broadcasts or broadcast segments, which, in the station's judgment, reflect the station's most significant programming treatment of ascertained community issues during the preceding three-month period.

WBZ-TV broadcasts both locally produced and network programming. Although we include primarily local programs herein, WBZ-TV broadcasts several network programs, including Face The Nation, 60 Minutes, and 48 Hours, which we believe also serve community needs and interests.

PROGRAM INDEX

I-Team Reports – Reporters Kathy Curran and Joe Shortleeve provide an investigative look at major institutions and events within the viewing area. Issues related to government, politics, big business, financial issues, corruption and crime are explored in-depth during the station's newscasts. Duration: range from two minutes to four minutes. Air: Monday - Friday, 5pm, 6pm and 11pm.

Healthwatch – Medical reports on recent developments and potential treatments in medicine. Duration: one minute and thirty seconds. Air: Monday - Friday, 5pm, 6pm and 11pm.

“Centro” – Regularly scheduled news interview broadcast segment providing an in-depth exploration of issues concerning the Latino community with host Yadires Nova-Salcedo. Duration: four minutes and thirty seconds. Air: Saturday, 7:50am and Sunday, 7:25am.

Keller At Large – Political Analyst Jon Keller interviews local politicians and community leaders to create dialogue about current events and issues of importance to New England citizens. Duration: eight minutes. Air: Sunday, 8:45am.

Curiosity – is an on-going series where we ask viewers: What intrigues you? What interests you? What confuses you? WBZ-TV finds answers to what our viewers are curious about. Viewers go to www.declareyourcuriosity.com to let us know and they just may find their curiosities have made their way on to WBZ-TV. Duration: 2 minutes. Air: Monday-Friday 5pm, 6pm, 11pm.

"Wednesday's Child" - News anchor Jack Williams is successfully increasing public awareness of the needs of children waiting for adoptive families. These children are primarily school-aged children, children of color of all ages, sibling groups and children who face intellectual, physical or emotional challenges. Duration: 2-3 minutes. Air: Wednesday 5pm.

"What's in Our Community" – A 4-minute feature segment that airs within the 30-minute "What's in Store" program. "What's in Store" is a half hour program that highlights businesses and entrepreneurs in the region. The "What's in Our Community" piece features the outstanding work of a local charity and/or community outreach organization. Duration: 4-minutes within thirty-minute program. Air: Sunday, 11:00am.

I-Team

4/12/10: I-Team's Kathy Curran reports on a Revere, Massachusetts pastor's misuse of church funds. An internal audit found \$80,000 worth of fraudulent credit card expenses, including an unapproved \$27,000 line of credit used by the pastor to renovate his basement. The audit also revealed \$423,000 missing in sales of church property.

4/30/10: I-Team's Kathy Curran reports on the controversial use of donations by the "Touched by Angels" charity. The charity has allegedly taken donations from the community to fund the organization and its employees. According to bank statements obtained by the I-Team, almost \$36,000 was deposited into Touched by Angels' bank account from October 2007 to March 2008.

5/3/10: I-Team's Kathy Curran conducts a follow-up report on the "Touched By Angels" charity. The charity's original contract says that eighty per cent of all donations go to the families in need. Upon review, that money donated to families is excluded from the charity's claim, and there are charges for shoes, nails and tanning on the charity's debit card. The founder feels she has done nothing wrong and cancelled interviews with the I-Team.

5/4/10: I-Team's Joe Shortsleeve reports on how medical professionals are abusing a powerful anesthetic that contributed to the death of Michael Jackson—Propofol. The I-Team found that this drug is not classified as a "controlled substance" so it is not monitored well.

5/6/10: I-Team's Kathy Curran reports on death threats toward the co-founder of the "Touched By Angels" charity. The threats occurred following the I-Team investigation, purportedly by people associated with the charity.

5/11/10: I-Team's Joe Shortsleeve reports on how an innocent Quincy, Massachusetts man is sent to jail for supposedly leaving sexually explicit voicemails on a female neighbor's phone. After further investigation, the court learned of a cheap on-line caller-ID spoofing service used by two men in Roslindale, Massachusetts to frame the Boston man. They are now facing several criminal charges.

5/11/10: I-Team's Joe Shortsleeve reports on the dangerous effects of a hazardous waste facility on a nearby elementary school. There is evidence of irresponsible operation, and so the town's health director has begun the process of shutting down the facility. According to WBZ's I-Team, there is now a formal state investigation.

5/17/10: I-Team's Joe Shortsleeve reports that the Massachusetts Department of Revenue has been spending millions of dollars on an office building meant for one hundred eighty workers. A source told WBZ that only about five workers have been reporting there for the past two years. Officials with the Department of Revenue refused to let the I-Team inside the building.

5/24/10: I-Team's Kathy Curran reports that millions of dollars have been sent to deceased farmers in Massachusetts and across the country. These farmers are receiving USDA's federal farm aid funded by taxpayer dollars. In a six-year period, \$1.1 billion in farm aid was paid to 172,801 deceased individuals. The USDA is trying to get the problem under control.

5/25/10: I-Team's Joe Shortsleeve reports on a Boston, Massachusetts funeral home facility operating without a licensed funeral director. With thirteen complaints filed in the Dorchester District court in Massachusetts against him, the former director, Roger Shields, now faces criminal charges. The current director would not answer any of the I-Team's questions.

5/26/10: I-Team's Kathy Curran reports on illegal handicapped parking by Massachusetts State Trooper Jonathan Brown getting coffee. The Massachusetts State Police Association says they don't condone state troopers parking in handicapped parking spots at any time. As a result, Trooper Brown is being disciplined for breaking the law.

6/2/10: I-Team's Kathy Curran reports on a mortgage fraud scheme involving lawyer Eric Levine. Levine was convicted with four others in a mortgage fraud ring that involved twenty-one properties and more than ten million dollars. His sentencing is set for September.

6/9/10: I-Team's Joe Shortsleeve conducts a follow-up report on the Boston, Massachusetts funeral home director faced with criminal charges in Dorchester, Massachusetts. The director is charged with operating without a license and is due back in court July 8.

6/10/10: I-Team's Joe Shortsleeve reports on car accidents involving city-owned vehicles. In an I-Team investigation of these accidents since 2003, cases dragged on for several years even when city-vehicles were clearly at fault. The city claims delays are due to their dependence on the court system schedule.

6/15/10: I-Team's Joe Shortsleeve reports on the usage of public donations to charities. Due to the high cost of professional telemarketers, many charities lose thousands of fundraised dollars to the solicitors' paychecks. Although the ratios sound staggering, they are legal as the current law does not regulate for-profit enterprises.

Healthwatch Reports

4/1/10: Healthwatch reports on how a new study shows that soda tax doesn't have an effect on lowering childhood obesity unless it's eighteen cents a can.

4/5/10: Healthwatch reports on a new study which estimates that if ninety-percent of women breastfed babies for their first six months, more than nine hundred infant deaths could be prevented. Over thirteen billion dollars in healthcare costs could also be saved.

4/6/10: Healthwatch reports on how McLean Hospital is performing new transcranial magnetic stimulation to help ease depression in patients who don't respond to medication. The report features an interview with patient Jillian Weresky and Dr. Oscar Morale of McLean Hospital.

4/7/10: Healthwatch reports on how men have significantly increased calorie intake over the past twenty years. In addition, Healthwatch reports that people may actually have to cut more than 3,500 calories to lose a pound. Finally, the report reveals that people are consuming far more calories than necessary. The report features an interview with Deborah Krivitsky of Massachusetts General Hospital.

4/8/10: Healthwatch reports that more women are suffering from high blood pressure during pregnancy. Additionally, researchers at Boston University have identified a gene which can identify which smokers are more likely to get lung cancer.

4/12/10: Healthwatch reports on how a new study finds that toddlers who are spanked at two years old are more aggressive at age four. The report features an interview with Dr. Marilyn Augustyn of Boston Medical Center.

4/13/10: Healthwatch reports on how eating healthy carbs which are high in fiber may actually help you lose weight.

4/14/10: Healthwatch reports on a new ankle replacement procedure. Healthwatch also reports on how researchers have identified a new gene related to hair loss. Additionally, local researchers at Massachusetts General Hospital and Boston University have found that an artificial pancreas can help keep insulin levels steady in diabetics.

Healthwatch reports on how some chiropractors are using an experimental new treatment to help lower blood pressure. The report features an interview with patients Adrian Gaspar, Bill Bird and chiropractor Dr. Peter Martone.

4/15/10: Healthwatch reports on how the local program Children's Trust fund runs child abuse prevention and parenting programs, and how they may lose funding due to state budget cuts. The report features an interview with Bonnie MacFarlane from Children's Trust Fund and parents John and Jacqui Falco who attend these programs.

4/19/10: Healthwatch reports on a new study which finds that second-hand smoke may irritate sinuses.

4/20/10: Healthwatch reports on a new report which found that Americans are consuming too much salt. The findings call on manufacturers to gradually lower sodium levels in products.

4/21/10: Healthwatch reports on how researchers are developing a new blood test which is showing a promise in detecting breast cancer.

4/22/10: Healthwatch reports on how being overweight may increase a breast cancer risk. Also, drinking red wine can lower risks of stroke.

4/26/10: Healthwatch reports on a new study which finds that the Northeast has very high asthma rates. The report features an interview with patient Mary White, Laurie Stillman of Regional Asthma Council of New England and Susan Sommer, a Registered Nurse at Children's Hospital.

4/27/10: Healthwatch reports on how more patients are seeing chiropractors to help lower blood pressure. The report features an interview with patients Adrian Gaspar and Bill Bird, along with chiropractor Peter Martone and hypertension expert Dr. George Bakris.

4/28/10: Healthwatch reports on how a new test can tell doctors whether a certain type of breast cancer is likely to spread. Researchers are reporting promising results in growing bone from stem cells in mice.

4/29/10: Healthwatch reports on how the Food and Drug Administration has approved a new prostate cancer vaccine called Provenge. This new report finds that the seasonal flu vaccination rate for last winter was up to a record forty percent due to H1N1 fears. In addition, an Irish woman gives birth to healthy baby after suffering cardiac arrest and being clinically dead for thirty minutes.

Healthwatch reports on how the doctors at Brigham and Women's perform a new life-saving surgery on a New Jersey teen with a rare tumor on his windpipe. The report features an interview with Brianna Ranzino, her mother Lisa, Dr. Charles Vacanti and Dr. Raphael Bueno of Brigham & Women's hospital

5/3/10: Healthwatch reports on a new study that finds that drinking more than two cups of coffee a day can lower the risk of uterine cancer.

5/4/10: Healthwatch reports on a new study that finds that mammograms don't detect breast cancer in younger women. Additionally, a new survey finds that many people still ignore warnings about avoiding sun exposure. Finally, local dermatologists offer free skin cancer screenings throughout month of May.

5/5/10: Healthwatch reports on a new study that finds that taking too much of certain supplements may actually increase one's risk of cancer.

5/7/10: Healthwatch reports on how watching 3-D movies may cause headaches and vision problems in some people. In addition, a new study finds that drinking too much caffeine and soda will not raise colon cancer risk.

5/10/10: Healthwatch reports on a new study that finds that certain heartburn drugs may increase risk of broken bones and infections.

5/11/10: Healthwatch reports on how Boston Medical Center is performing new experimental stem cell therapy to aid in the regrowth of bone in hip patients. Healthwatch's report features an interview with patient Jose Belsol and Dr. Thomas Einhorn of Boston Medical Center.

5/12/10: Healthwatch reports on a new study which finds that even though thirty percent of people think they have food allergies, in reality, only five percent of adults actually do. The report features an interview with Dr. Hans Oettgen of Children's Hospital.

5/13/10: Healthwatch reports on how Walgreen's has decided not to start selling home gene testing kits due to concerns about reliability.

5/14/10: Healthwatch reports on how FDA lifts its warning on the Rotarix vaccine. In addition, Healthwatch reports on a new study that finds that the quality of daycare or home care is important in influencing a child's behavior and performance in school.

5/17/10: Healthwatch reports on a new study which finds that there is no conclusive evidence that cellphone use is linked to brain tumors. Healthwatch's report features an interview with Dr. Tracy Batchelor of Massachusetts General Hospital's Cancer Center.

5/18/10: Healthwatch reports on how a Worcester, Massachusetts facility is looking for patients for their study of a new arthritis pill. The report features an interview with patient Carol Bagshaw and Dr. Charles Birbara of the Clinical Pharmacology Study Group.

5/20/10: Healthwatch reports on a new study which finds that putting autistic kids on gluten and dairy free diets does not decrease symptoms. The report features an interview

with RN Pam Ferro of Hopewell Associates and Dr. Timothy Buie of Massachusetts General-Newton Wellesley Hospital.

5/24/10: Healthwatch reports on how a new study finds that cutting back on soda can help lower blood pressure. Additionally, a new report finds a significant increase in the number of children who ingest button cell batteries.

5/26/10: Healthwatch features a Consumer Report on new sunscreen testing. Additionally, a new report finds that certain herbal supplements contain traces of lead. Finally, the report features a pesticides interview with Elizabeth Saunders of Clean Water Action.

5/27/10: Healthwatch reports on how Massachusetts Institute of Technology researcher develops a new blood test for food allergies. The report features an interview with Dr. Christopher Love of Massachusetts Institute of Technology.

5/28/10: Healthwatch reports on how a new hearing device which includes a sensor implanted in skull is helping hearing impaired.

5/31/10: Healthwatch reports on how scientists say the new breast cancer vaccine is showing promise in preventing and slowing growth of breast tumors in mice.

6/1/10: Healthwatch reports on a new laser procedure to help eliminate spider veins. Second, a new study finds eighty per cent of people who seek treatment for depression are prescribed antidepressants. Finally, babies born to women who gain too much weight during pregnancy have a higher risk of developing heart disease.

6/2/10: Healthwatch reports on how taking certain pain relievers may cause "rebound headaches." A new study finds that the genetic mutations which increase a woman's risk of breast cancer are not affected by lifestyle factors such as exercise or alcohol intake.

6/3/10: Healthwatch reports on how a former Boston College High school football coach is battling Amyotrophic Lateral Sclerosis (ALS). He is organizing a fundraiser to help former player and coach left paralyzed in a car crash. The report features interviews with Coach Jim Cotter and daughter Grace Regan.

6/4/10: Healthwatch reports on how less invasive laparoscopic liver transplants are reducing both recovery time and the risk of complications for patients.

6/7/10: Healthwatch reports on a new study that finds kids can benefit from balloon sinuplasty.

6/8/10: Healthwatch reports on how the Food and Drug Administration committee is going to consider whether or not to approve a new morning after pill, ellaOne, which works up to five days after sex.

6/9/10: Healthwatch reports on a new study that finds taking ibuprofen can raise risk of stroke, but taking naproxen can lower heart risk. Another study finds that short people have a higher risk of developing heart disease.

6/10/10: Healthwatch reports on how a growing number of kids are taking vitamins and other supplements.

6/11/10: Healthwatch reports on how several drug companies are working together to develop Alzheimer's treatments.

6/14/10: Healthwatch reports on a new study that finds many cancer patients are skipping treatment because they can't afford it.

6/15/10: Healthwatch reports on how doctors in the District of Columbia perform a historic fourteen-way kidney exchange.

6/16/10: Healthwatch reports on a new study that finds that prescription pain gels may be more effective than oral pain medications.

6/17/10: Healthwatch reports on how the Food and Drug Administration committee recommends approval for the new morning after pill, ellaOne.

6/21/10: Healthwatch reports on a new study that finds people who suffer from severe anxiety have higher risk of heart disease.

6/22/10: Healthwatch reported on how the Center for Science in the Public Interest is filing lawsuit to ban toys in Happy Meals.

6/23/10: Healthwatch reports on the largest study to date in Lancet finds that living next to cell phone towers does not increase cancer risk.

6/24/10: Healthwatch reports on how health officials are trying to control outbreak of whooping cough cases after more than nine hundred people get sick

6/25/10: Healthwatch reports on how Massachusetts Eye and Ear develops a new device and is performing artificial cornea transplants. The report features interviews with Dr. Kathryn Colby of Massachusetts Eye and Ear and patient Peter Willey.

6/28/10: Healthwatch reports on how scientists have developed a new blood test which can predict when a woman will reach menopause years before it happens.

6/29/10: Healthwatch reports on how scientists say a new blood test which is less invasive than amniocentesis may help detect genetic abnormalities in babies. Second, a new report finds that inducing labor when it's not medically necessary increases health risks for both mothers and babies.

Ethnic Relations: “Centro”

4/10/10: WBZ's Yadires Nova-Salcedo talks with Josi Chapman, Director of ABCD'S "SummerWorks" program.

4/17/10: WBZ's Yadires Nova-Salcedo talks with Mr. Richard Walega, New England Regional Director, of the U.S. Department of Housing and Urban Development (HUD).
